

- 1) Update Project Settings
- 2) Search/Replace 'NSGregorianCalendar' with 'NSCalendarIdentifierGregorian'
- 3) Search/Replace 'NSMinuteCalendarUnit' with 'NSCalendarUnitMinute'
- 4) Search/Replace 'NSHourCalendarUnit' with 'NSCalendarUnitHour'
- 5) Search/Replace 'NSDayCalendarUnit' with 'NSCalendarUnitDay'
- 6) Search/Replace 'NSMonthCalendarUnit' with 'NSCalendarUnitMonth'
- 7) Search/Replace 'NSYearCalendarUnit' with 'NSCalendarUnitYear'
- 8) Search/Replace 'NSSecondCalendarUnit' with 'NSCalendarUnitSecond'
- 9) Search/Replace 'self.wantsFullScreenLayout = YES;' with '[self setEdgesForExtendedLayout: UIRectEdgeAll];'
- 10) Search/Replace in accordance with <http://www.buzztouch.com/forum/thread.php?tid=17197693FE0F18530A39FE8>
- 11) Search/Replace '[UIApplication sharedApplication] setStatusBarItemHidden:statusBarItemHidden withAnimation:UIStatusBarAnimationNone;]' with '[self prefersStatusBarHidden];'
- 12) Search/Replace '[UIApplication sharedApplication] setStatusBarItemStyle:statusBarItemStyle;]' with '[self preferredStatusBarStyle];'
- 13) Search/Replace 'NSString *escapedUrl = [tmpURL stringByAddingPercentEscapesUsingEncoding:NSUTF8StringEncoding];' with 'NSString *escapedUrl = [tmpURL stringByAddingPercentEncodingWithAllowedCharacters:[NSCharacterSet URLFragmentAllowedCharacterSet]];'
- 14) Search/Replace 'NSURL *escapedURL = [NSURL URLWithString:[useURL stringByAddingPercentEscapesUsingEncoding:NSUTF8StringEncoding]];' with 'NSURL *escapedURL = [NSURL URLWithString:[useURL stringByAddingPercentEncodingWithAllowedCharacters:[NSCharacterSet URLFragmentAllowedCharacterSet]]];'
- 15) Search/Replace '[self dismissModalViewControllerAnimated:YES];' with '[self dismissViewControllerAnimated:YES completion:nil];'
- 16) Comment out 'tmpBtn.segmentedControlStyle = UISegmentedControlStyleBar;'
- 17) Search/Replace 'UIBarButtonItemStyleBordered;' with 'UIBarButtonItemStylePlain;'
- 18) Search/Replace 'UITextAlignmentCenter' with 'NSTextAlignmentCenter'

- 19) Search/Replace
 'UIInterfaceOrientationIsPortrait(theViewController.interfaceOrientation) ? 44 : 44;' with '44;'
- 20) Search/Replace 'UITextAlignment' with 'NSTextAlignment'
- 21) Add '-(void)clickedOnButton:(int>alertTag;' to
 BT_viewController.h
- 22) Comment Out '-(void>alertView:(UIAlertView *)alertView
 clickedButtonAtIndex:(NSInteger)buttonIndex;' in
 BT_viewController.h
- 23)

Replace several alertView popup code with the following:
 UIAlertController * alertView = [UIAlertController

```
alertViewWithTitle:NSString(@"emailsNotSupportedTitle", @"Email Not Supported")
```

```
message:NSString(@"emailsNotSupportedMessage", @"Sending emails is not supported on this device.")
```

```
preferredStyle:UIAlertControllerStyleAlert];
```

```
        UIAlertAction* yesButton = [UIAlertAction  

        initWithTitle:@"OK"
```

```
style:UIAlertActionStyleDefault
```

```
handler:^(UIAlertAction * action) {
```

```
        //Handle your yes
```

```
please button action here
```

```
        [self
```

```
clickedOnButton:103];
```

```
    }];
```

```
        [alertView addAction:yesButton];
```

```
        [self presentViewController:alertView  

        animated:YES completion:nil];
```

In some cases "[self.window.rootViewController
 presentViewController:alertView animated:YES completion:nil];"
